

## Map Your Neighborhood: Results and Analysis

### Executive Summary

Map Your Neighborhood (MYN) is a neighborhood-based effort aimed at helping Rose Villa prepare for various disasters, such as earthquakes, power outages, winter storms, heat domes, fires, and smoke. Beginning in the summer of 2022, Ready Force has held 11 MYN meetings to educate residents on disaster preparation and response, identify neighborhood meeting places to gather in the immediate aftermath of a major disaster, and inventory neighborhood equipment and supplies valuable during disaster response.

This report summarizes the data Ready Force collected during these neighborhood meetings. Highlights include

- **Emergency Water and Food:** While nearly three-quarters of residents have three days or more emergency water stored for an emergency, more education of residents is required to bring residents up to the recommended 2-week supply of emergency water. Over 80% of residents store at least 3-days of extra food in preparation for a disaster.
- **Sanitation:** Almost one-quarter of residents report pre-planning should our water supply get shut off by obtaining an alternative toilet backup system.
- **Mobility Concerns:** 19% of residents reported that they may need help evacuating during an emergency due to mobility concerns.
- **Air Filtration:** Almost half of the residents own portable HEPA air filters to mitigate unhealthy air during wildfire season.
- **Disaster Response Training:** Seventeen residents report being CERT-trained in disaster response. Ready Force hopes to double this number in 2024.
- **Communication:** Ready Force's network of FRS 2-way radios includes over ten percent of residents spread throughout the campus.
- **Backup Power:** Almost 30% of residents report owning a battery backup system, such as a Jackery or Bluetti.

Please refrain from viewing these results as wholly accurate. They serve as approximate snapshots in time. The data collection started in the summer of 2022 and extended into the fall of 2023. The information relies on self-reported data, and errors occurred during the process, stemming from residents' uncertainty about our inquiries and our interpretation of their responses.

# Map Your Neighborhood: Results and Analysis

## Introduction

Map Your Neighborhood (MYN) is a neighborhood-based effort aimed at helping Rose Villa prepare for various disasters, such as earthquakes, power outages, winter storms, heat domes, fires, and smoke. The critical window for an effective disaster response is the first hour after it occurs, often called the Golden Hour. This timeframe is crucial for saving lives, minimizing injuries, and mitigating damage to property and the environment.

Since we have no control over when a disaster occurs, Ready Force is preparing for a worst-case scenario: 2:00 AM on a Saturday when few Rose Villa staff are present to assist. By familiarizing ourselves with our neighbors' preparedness and needs, we can enhance our community's ability to act swiftly and effectively.

In the aftermath of a major disaster, we may find ourselves waiting for assistance or power restoration for days, weeks, or even longer. Map Your Neighborhood offers a blueprint to unite our community during such a crisis. Through collaborative efforts, we can significantly reduce the severe impact of disasters.

## Goals of Map Your Neighborhood

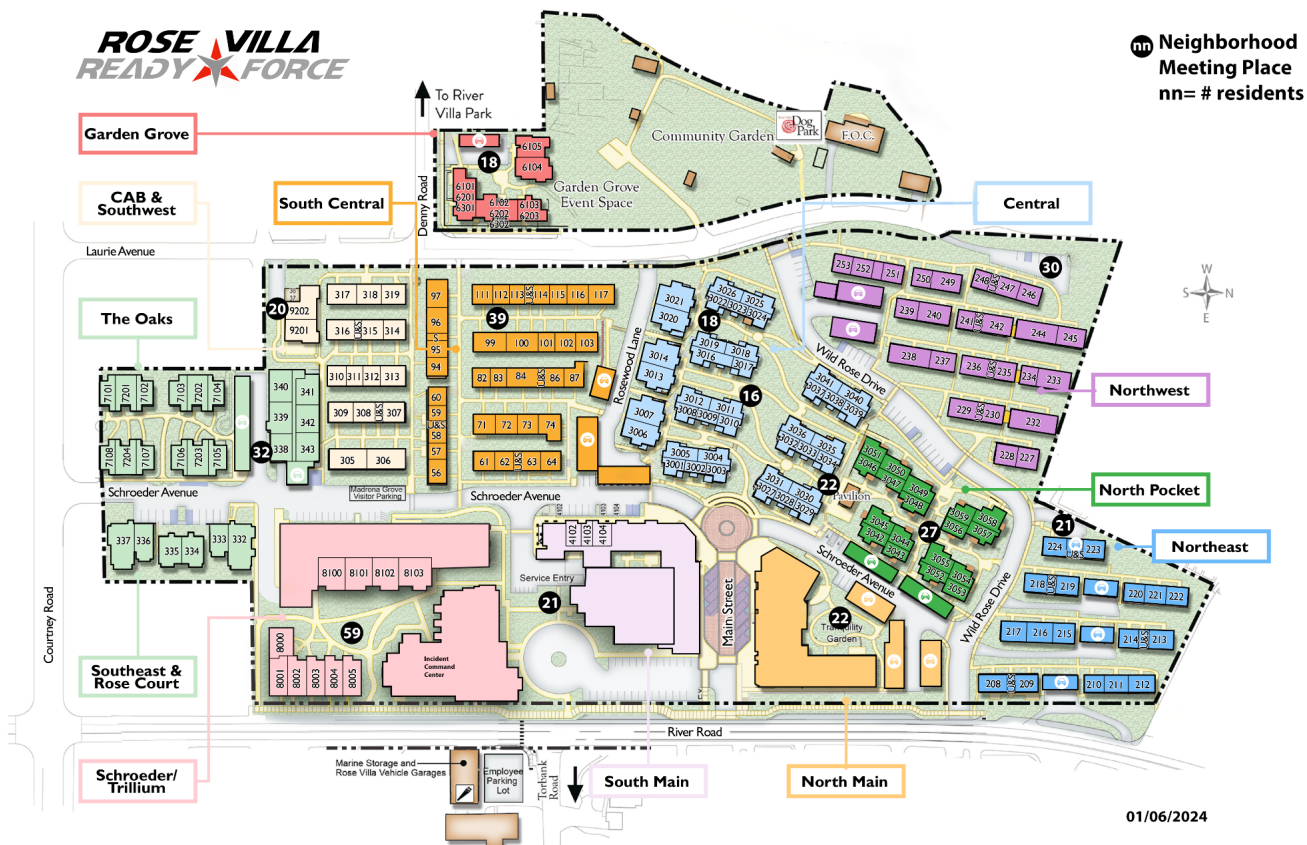

- Learn the steps to follow immediately following a disaster to protect yourself, your family & pets, and your neighborhood.
- Establish a neighborhood meeting place where neighbors will gather immediately after a disaster occurs.
- Identify the skills and equipment each neighbor has that are useful for an effective and timely disaster response. Knowing which neighbor has supplies and skills helps our disaster response be timely and allows everyone to contribute meaningfully.
- Establish a neighborhood contact list that helps identify those with specific needs, such as mobility, disabilities, and cognitive issues, who may need help in the immediate aftermath of a disaster.
- Prepare to work together as a team to evaluate your neighborhood during the first hour following a disaster and take the necessary actions.

## Identifying the Neighborhoods

Ready Force has divided the Rose Villa community into 11 neighborhoods based on building type and geographic location. For each neighborhood, residents agreed to an outdoor, visible meeting place. Residents of the Central (Pocket) neighborhood chose three meeting places due to their size, the slope of their neighborhood, and the mobility constraints of several residents.

# Map Your Neighborhood: Results and Analysis

Rose Villa Neighborhoods			
	Neighborhood	Neighborhood Meeting Place	Number Residents
1	Central (Pocket)	Central A - Sidewalk in front of #3020	18
		Central B - Fire pit in front of #3011	16
		Central C - Sidewalk in front of Pavilion	22
2	Garden Grove	Garden Grove Carports	18
3	North Main	Tranquility Garden	22
4	North Pocket	Central Circle east of cottage #3048	27
5	Northeast	Parking area west of cottage #224	21
6	Northwest	Parking area west of cottage #246	30
7	The Oaks, Southeast & Rose Court	The Oaks carports	32
8	Schroeder & Trillium	Central courtyard	59
9	South Central	Picnic area in front of cottages #111 & 112	39
10	South Main	Sidewalk south of mailroom	21
11	Southwest & CAB	CAB carports	20

# Map Your Neighborhood: Results and Analysis

## Neighborhood Preparedness Meetings

The Ready Force Map Your Neighborhood project began in the Fall of 2019 with a meeting of North Pocket neighbors. Unfortunately, COVID-19 intervened. We kept some momentum going using Zoom and restarted our physical neighborhood meetings in the summer of 2022.

Under the best scenario, Ready Force volunteers serve as their neighborhood's MYN leaders, gathering their neighbors and conducting neighborhood meetings. Two neighborhoods lacked volunteers willing or able to serve as leaders, and the Ready Force Executive Committee stepped in to run the meeting.

In addition to organizing Map Your Neighborhood meetings, neighborhood volunteers assist Ready Force in distributing the Resident Emergency Response Guide (Red Binders) to new neighborhood residents, explaining the role of Ready Force, and collecting their MYN data.

Neighborhood Preparedness Meetings		
Neighborhood	Meeting Date	MYN Volunteers
North Main	07/09/2022	Mary Eusterman, Mayo Marsh, Betty Hosokawa, Susan Nestor
Southwest & CAB	07/22/2022	Louise Williams, <i>Frank &amp; Penny Ramos</i>
South Main	10/01/2022	<i>Mayo Marsh, Susan Nestor</i>
South Central	11/05/2022	Margaret Bell, Frank & Penny Ramos, Susan Van Voorhis, <i>Louise Williams</i>
Garden Grove	01/21/2023	Jude Watson
Schroeder & Trillium	07/19/2023	Diana Stallard, Nancy Dorn
Oaks, Rose Court, SE	07/22/2023	Carl Peterson, Larry Sager, Jean Lofy, <i>Margaret Bell</i>
NE Classic	08/19/2023	Judith Pearson, Val LeGault, <i>Margaret Bell</i>
NW Classic	10/07/2023	<i>Executive Committee</i>
Central Pocket	11/04/2023	<i>Executive Committee</i>
North Pocket	11/11/2023	Steve Morris

Note: Volunteers in *italics* helped run the MYN meeting but reside in a different neighborhood

We aim to hold Map Your Neighborhood *update* meetings at least every two years. Some neighborhoods may elect to have their update meetings annually. In addition, residents can update their Map Your Neighborhood data during the ROSE Refresh Party or by simply informing their neighborhood Ready Force volunteers or the Executive Committee.

## Neighborhood Skills and Inventory Results

Like much of the country, Rose Villa has experienced several disasters over the last few years, including an ice storm, power outages, excessive heat, wildfire with resulting unhealthy smoke, and a pandemic. These disasters illustrate why being prepared can make a big difference. Being prepared is especially true in the event of a Cascadia Subduction Zone earthquake, when it may take days or weeks for staff and first responders to reach everyone who needs help.

A large part of Ready Force's mission is to empower our residents to be as prepared as possible in an emergency because once a disaster strikes, the time to prepare has passed. We recommend residents have an emergency plan and enough food, water, and supplies to survive on their own for at least two weeks following any large-scale disaster. Being prepared

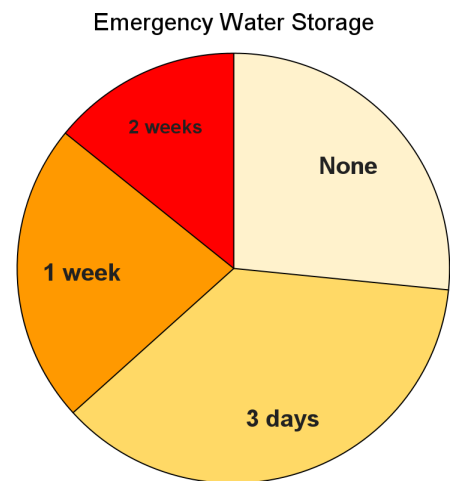

- Takes pressure off staff and first responders so they can prioritize life-threatening situations and those most vulnerable.
- Ensures residents can survive if roads are impassable and no one can reach us with help or supplies.
- Encourages neighbors to care for one another, especially those most vulnerable.

### Emergency Water Storage

Ready Force encourages residents to store a 2-week supply of food and water. The pie chart illustrates that only 14% of residents have stored two weeks of emergency water. Another 23% of residents have one week of emergency water. We still have work to do to encourage residents to store more water.

Lack of storage space is the most frequent reason for not storing more water. During the MYN meetings, we informed residents that Rose Villa's Building Operations Department will work with households needing additional storage space to develop solutions for water storage.

Almost half of residents reported owning a water purifier device that they could use to filter water in a disaster.

346 total residents	Emergency Water Storage				Water Purifier (Bacterial)	Water Purifier (Virus)
	None	3 Days	1 Week	2 Weeks		
Number of Residents	92	127	78	49	102	56
Percent of Residents	27%	37%	23%	14%	29%	16%

# Map Your Neighborhood: Results and Analysis

## Emergency Food Storage

Over 80% of residents store extra food in preparation for a disaster.

Should Rose Villa lose power during a disaster, food preparation is a concern. Many residents own outdoor grills and camping stoves, which will be helpful for food preparation during a disaster (27% of residents own outdoor grills; 32% of residents own camping stoves). It was joked that in the aftermath of a Cascadia earthquake, should we lose power, residents would gather for a big barbeque of meat and other perishables to prevent spoilage.

Emergency Food Storage

346 total residents	Emergency Food Storage				Grill	Camp Stove
	None	3 Days	1 Week	2 Weeks		
Number of Residents	55	47	137	107	92	112
Percent of Residents	16%	14%	40%	31%	27%	32%

## Disaster Sanitation

An often overlooked plan for disasters is the need for alternative toilets should our water pipes burst. Eighty residents, or 23%, reported having an alternative toilet, for example, twin 5-gallon buckets with seats.

Alt. Toilet

346 total residents	Disaster Sanitation
	2-bucket toilet (or other alternative toilet)
Number of Residents	80
Percent of Residents	23%

## Map Your Neighborhood: Results and Analysis

### Medical Concerns, Skills, and Equipment

We surveyed our residents to determine who would like assistance evacuating from their homes should a disaster occur. 7% of residents feel they would like help with evacuation, and an additional 12% might need assistance.

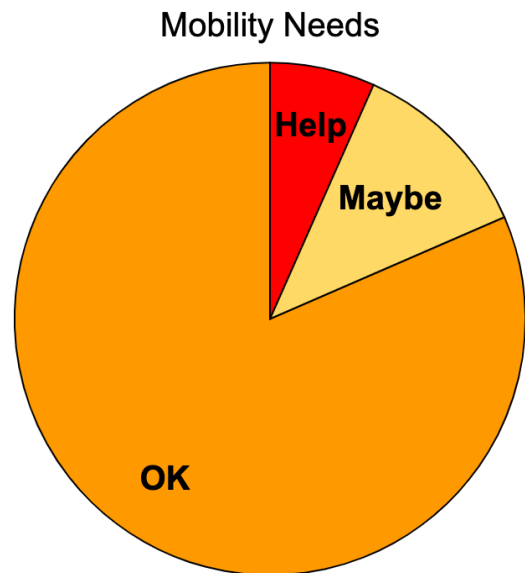

About one-fourth of our residents report using medical equipment, including canes, walkers, wheelchairs, CPAP machines, and supplemental oxygen.

At least 36 residents report using CPAP machines. Powering the CPAP machines is a concern should Rose Villa lose power, as a backup power source is needed. Only 13 of these 36 residents using CPAP machines reported also having a backup power station, such as a Jackery or Bluetti.

Not surprisingly, 67% of our residents report using glasses, and 34% report using hearing aids. Two residents are legally blind.

57% of residents reported using crucial medications, and many expressed concerns about their ability to obtain a 2-week emergency supply of their essential medicines due to insurance or doctor limitations. Residents taking crucial medications requiring refrigeration were advised to have a plan in place should Rose Villa lose power.

188 residents, or 54%, have some form of an advanced directive. Ready Force provided residents with File of Life forms during the Map Your Neighborhood meeting.

346 total residents	Mobility Needs for Evacuation			Medical Equipment	Glasses / Blind	Hearing Aids	Crucial Meds	Advanced Directive
	Needs Help	Might Need Help	No Help Needed					
<b>Number of Residents</b>	23	42	280	94	233	117	197	188
<b>Percent of Residents</b>	7%	12%	81%	27%	67%	34%	57%	54%

# Map Your Neighborhood: Results and Analysis

## Resident Medical Training and Skills

Rose Villa has a surprising number of retired physicians, nurses, and other medical professionals. Forty-one residents reported having a medical background, including 10 MDs, two Nurse Practitioners, two Physician Assistants, 17 nurses, one EMT, and two psychologists. While it is doubtful that any of these retired medical professionals have kept their medical licenses current, they can be helpful in the immediate hours following a significant disaster.

We surveyed residents on their first aid, CPR, and AED knowledge. Our criteria was that they received training in the last five years or felt reasonably competent in the skill.

Well over half of residents have a first aid kit in their homes. In addition, Ready Force has distributed ten [First Responder Vehicle](#) first aid kits to residents in ten neighborhoods. Two additional kits are on order, which we hope to distribute to the remaining neighborhoods in January 2024.

346 total residents	Medical Training and Skills					1st Aid Kit
	Retired Medical Professional	1st Aid Training	CPR Training	AED Training	Crisis Counseling	
Number of Residents	41	101	84	60	60	235
Percent of Residents	12%	29%	24%	17%	17%	68%

## Air Filtration

After the wildfires of 2020, many residents have invested in portable HEPA air filters to improve indoor air quality.

346 total residents	Air Filtration	
	HEPA Air Filter	N95 Masks
Number of Residents	158	273
Percent of Residents	46%	79%

## Map Your Neighborhood: Results and Analysis

### Disaster Response Skills and Equipment

Ready Force is modeled after the Community Emergency Response Team's (CERT's) approach to disaster preparation and response. Our records show 19 CERT-trained residents. We plan to double this number by offering our own CERT-Lite training on campus in 2024.

346 total residents	Disaster Response Skills					
	CERT Trained	Search & Rescue	Firefighter	Fixing Things	Camp Cook	Organizer
Number of Residents	19	23	27	78	80	107
Percent of Residents	5%	7%	8%	23%	23%	31%

346 total residents	Disaster Response Equipment				
	Flashlights	Extra Batteries	Axe	Crowbar	Bicycle
Number of Residents	311	275	38	57	68
Percent of Residents	90%	79%	11%	16%	20%

### Communication

Ready Force has distributed 31 FRS 2-way radios across campus for emergency communication in the aftermath of a disaster. An additional 10 residents report having their own FRS or GMRS radios, which we will explore using in our disaster communication planning.

Seven residents have ham radio licenses, with five of them reporting owning a ham radio. Several of these residents have begun refreshing their ham radio skills and communicating with the Oak Lodge CERT group during their weekly check-ins.

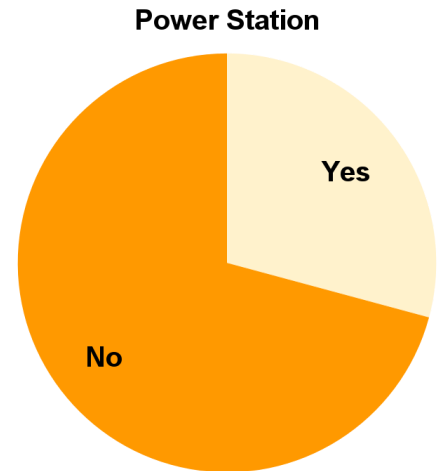

346 total residents	Communication Equipment			
	FRS/GMRS Radio	Ham Radio Operator	Ham Radio	CB Radio
Number of Residents	41	7	5	8
Percent of Residents	12%	2%	1%	2%

# Map Your Neighborhood: Results and Analysis

## Back-up Power

Much of Rose Villa experienced six days without power during the ice storm of 2021. A battery power station, such as a Jackery or Bluetti, can assist in powering medical devices, some lighting, and other modest electrical needs. Portable solar panels can be helpful for recharging power stations.

346 total residents	Back-Up Power	
	Power Station	Solar Panels
Number of Residents	100	36
Percent of Residents	29%	10%

## Pets

At Rose Villa, it seems as if everyone owns a pet. Surprisingly, only 21% of the homes on campus have one or more dogs as part of their family, and another 16% have one or more cats.

During our Map Your Neighborhood meetings, pet owners were reminded that they must have a carrier for their pet to be housed at an emergency shelter area. In addition, we reminded pet owners to store water, food, medicines, and kitty litter for their pets to cover at least two weeks following a disaster.

262 Total Homes	Pets		
	Dogs	Cats	Others
Number of Homes with Pets	55	42	3
Percent of Homes with Pets	21%	16%	1%
Number of Pets	63	56	4

# Map Your Neighborhood: Results and Analysis

## Neighborhood Contact Lists

Map Your Neighborhood meetings allowed us to produce neighborhood contact lists, including cell phone numbers and email addresses, which we distributed to neighborhood Ready Force volunteers. Not surprisingly, almost all residents nowadays have cell phones and email addresses we were able to include in the neighborhood contact lists.

346 total residents	Neighborhood Contact Lists	
	Cell Phone	Email
Number of Residents	301	327
Percent of Residents	87%	95%

Neighborhood MYN volunteers also received detailed reports on the Map Your Neighborhood emergency supplies, skills, and equipment of their residents. Ready Force left it up to the neighborhood volunteers to determine the most appropriate way to distribute this information to their fellow residents.

## Seven Steps to Take Immediately Following a Disaster

During the Map Your Neighborhood meetings, Ready Force explained to residents the seven steps to take to secure their homes and protect their neighborhoods immediately following a disaster. Since it's hard to think clearly following a disaster, using these steps will help to quickly and safely take actions that can minimize damage and protect lives.

Step 1. **Take care of your loved ones and pets.** Do not call 911 unless necessary. Remember, 911 is an emergency-only number.

Step 2. **Dress for safety:** A bicycle helmet or hard hat protects from falling debris. Leather gloves protect from sharp objects.

Step 3. **Place the “Help” or “OK” sign on your front door or window.** Posting the sign helps your neighbors locate those who need help first.

Step 4. **Put your fire extinguisher on the sidewalk** or where neighbors can see it. This way, extinguishers are immediately available if a neighbor has a small fire after a disaster.

Step 5. After completing steps 1 – 4, **go to the Neighborhood Meeting Place.**

# Map Your Neighborhood: Results and Analysis

## Seven Steps to Take Immediately Following a Disaster (Continued)

Step 6. **Form teams** at the Neighborhood Meeting Place:

Communication Team 1 will listen to the Emergency Alert System (KOPB 91.5 FM) or a NOAA weather radio station and keep neighbors informed of what they learn. Ready Force volunteers with FRS radios will communicate with the Incident Command Center to report on their neighborhood status and request resources.

Team 2 will check on neighbors with mobility issues. Take any neighbors who need help to the medical triage area. Then, return to the neighborhood meeting place to share what you have done.

Team 3 will check on all homes with the “Help” sign displayed on the front door or window or with no card showing. Be prepared to give first aid.

Step 7. After your team has completed its work, **return to the Neighborhood Meeting Place**. Share what you have done with the rest of your neighbors.

## Results by Neighborhood

The following five pages report on the Map Your Neighborhood results per neighborhood.

Please refrain from viewing these results as wholly accurate. They serve as approximate snapshots in time. The data collection started in the summer of 2022 and extended into the fall of 2023. The information relies on self-reported data, and errors occurred during the process, stemming from residents' uncertainty about our inquiries and our interpretation of their responses.
